

BASIT ALI

AI / LLM Engineer — Agentic Workflows, RAG Systems & Intelligent Automation

Islamabad / Rawalpindi, Pakistan
basitaliaps@gmail.com
linkedin.com/in/basit-ali-aps

PROFESSIONAL SUMMARY

AI/LLM Engineer with hands-on experience designing and deploying production-grade Retrieval-Augmented Generation (RAG) pipelines and agentic AI workflows. Specialized in building multi-step automation systems using LangChain, LangGraph, and n8n, integrating LLM-driven agents with backend services, dashboards, and business process data. Strong backend engineering foundation in Node.js, NestJS, and Prisma ORM, with a track record of shipping AI-powered tools that automate real organizational workflows end-to-end.

CORE SKILLS

Agentic AI & Automation: LangChain, LangGraph, n8n (workflow automation), multi-agent orchestration, prompt engineering, Retrieval-Augmented Generation (RAG)

LLMs & AI Platforms: Claude (Anthropic), DeepSeek V4, Llama 3.3, Anthropic API integration

Backend Development: Node.js, NestJS, Prisma ORM, REST API design

Frontend Development: Angular

Tools & Integration: n8n cross-system automation, Playwright, Firebase, Stockfish engine integration, BPMN process modeling

EXPERIENCE

Backend & AI Engineer

July 2024 – Present

Sustainstrat Analytics SMC Pvt. Ltd.

- **Built a Retrieval-Augmented Generation (RAG) chatbot** that retrieves real company process, organization, and structure data (jobs, activities, BPMN diagrams) to power contextual, natural-language Q&A.
- **Designed and orchestrated agentic AI workflows** using LangChain and LangGraph to orchestrate multi-step automation across process and organization management modules, coordinating multiple AI agents toward complex task completion.
- **Automated cross-system business workflows** using n8n, connecting AI agents to the Digital Twin dashboard for automated data synchronization and What-if Analysis triggers — eliminating manual handoffs between systems.
- **Built a Digital Twin server** applying DeepSeek V4 combined with rule-based logic for process optimization, generating AI-driven suggestions (e.g., removing redundant gateways) directly on auto-generated BPMN diagrams.
- **Engineered backend services and REST APIs** using Node.js, NestJS, and Prisma ORM to support the AI and automation layers above.

Frontend Development Intern

June 2023– August 2023

NICAT Technology Solutions

- **Built responsive frontend interfaces** using the React framework.
- **Collaborated with backend teams** for seamless API integration and UI improvements.
- **Improved user experience** through design enhancements and iterative feedback incorporation.

AUTOMATION & AGENTIC AI PROJECTS

Testomatic — Final Year Project — AI-Powered UI Test Automation Platform

- **Extracted DOM elements** from a given URL to identify testable UI components.
- **Used LangGraph-based agent workflows** to map UI components (buttons, inputs, form fields) into a structured, agent-navigable representation.
- **Generated automated test code** via an LLM (Llama 3.3) based on the mapped components.

- **Executed generated tests end-to-end** using Playwright, closing the loop from raw webpage to running test suite with no manual scripting.

Digital Twin Automation Pipeline — *Cross-system Workflow Automation*

- **Designed n8n automation flows** to connect AI agents, the Digital Twin dashboard, and downstream systems for automated data sync.
- **Built event-driven triggers** that route data between LangChain/LangGraph agents and business process dashboards to trigger What-if Analysis scenarios automatically.

Chess AI Integration — *Real-time Multiplayer Game*

- **Built a real-time multiplayer chess game** integrating the Stockfish chess engine with Firebase for real-time state sync between players.

CERTIFICATIONS

Anthropic Certified Professional — AI/LLM Development & Claude Integration (2026)

- **Earned 4 Anthropic certifications** across LLM development and Claude integration.
- **Applied certified skills** to build production RAG pipelines and agentic AI systems.

EDUCATION

Bachelor of Science in Software Engineering

Bahria University, Islamabad

Graduated June 2026
